

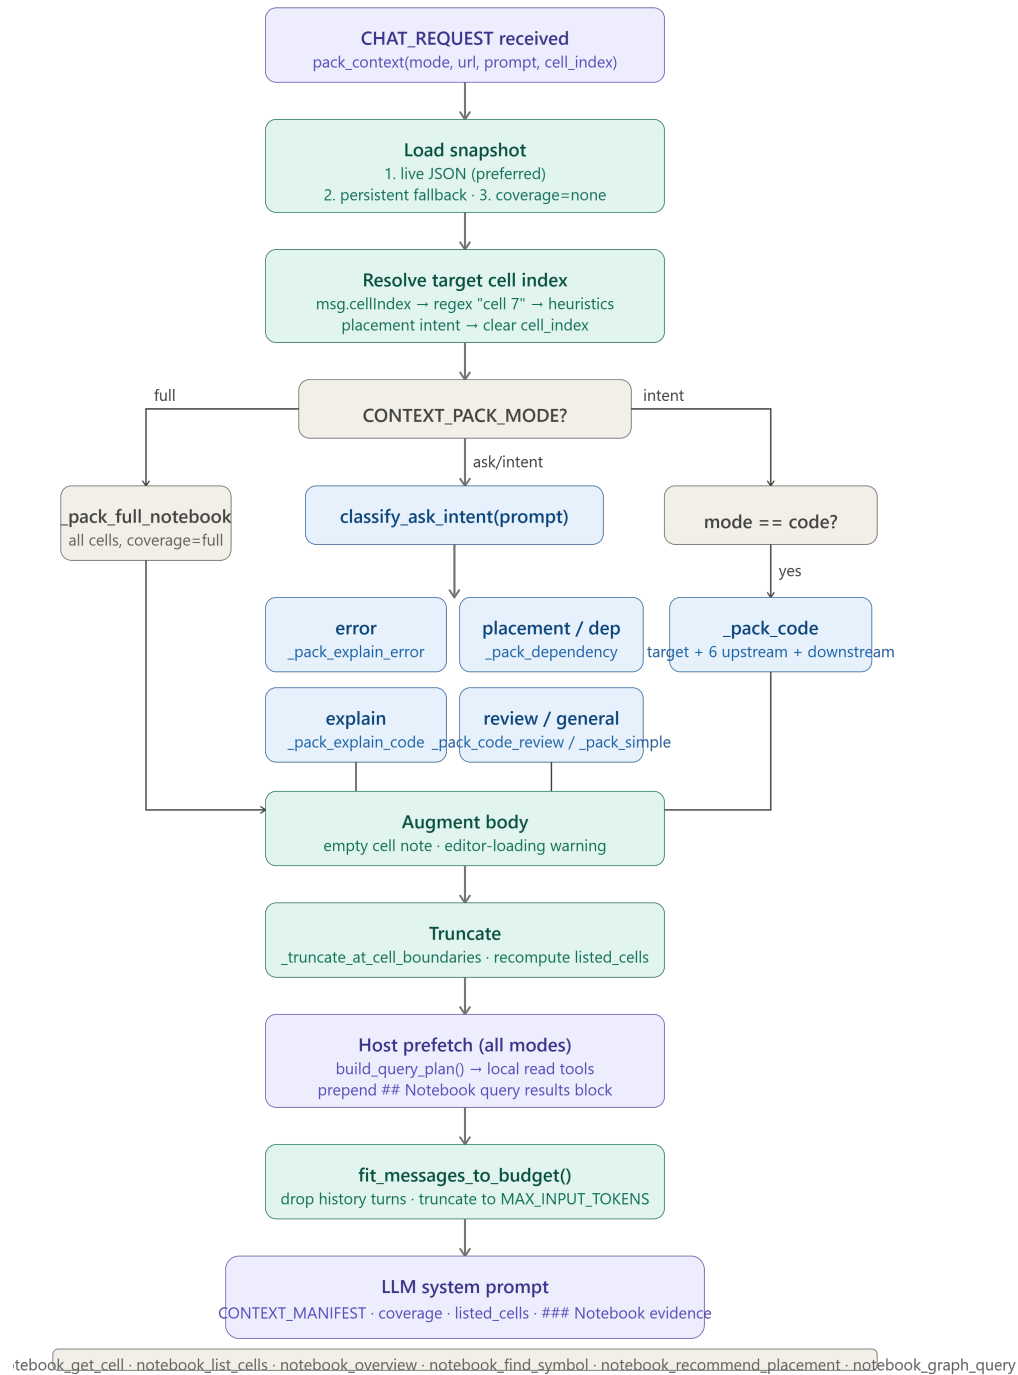

Figure 3.5: Context packing and notebook intelligence pipeline on the host.

- **Browser tools** are forwarded to the extension for **DOM** operations. Examples include `insert_cell`, `edit_cell_by_index`, `delete_by_index`, and `run_cell`.

Agentic execution is governed by configuration flags in `config.py`:

- **AGENTIC_MANDATORY_TWO_PHASE** (default on): round 0 strips write tools; round 1 strips
